Comments: I would love to see wild life in the forest,when I walk around. But all I see are trees and rocks.

Without clearings for grass and other food choices for animals,their will not be any animals, much like today. We walk for miles without hearing or seeing birds,rabbits or any other sings of animals. I hear stories every day from older people that once saw all kinds of wild life,that I,myself have never saw or herd in the wild. I've walked miles of streams and creeks with out seeing any signs of life. If we can get things changed with Foothills Landscape Project #52509,there's still a chance for me and my children to see the animals we've herd of, but have never seen in the wild. I support my second amendment. I love to hunt and fish for food and recreation. Some of the game I,hear about that was there in the older days,I will never hear or see. That feeling is as bad as being lost in the woods with out hearing or seeing anything other than trees with no possible way out.
