Comments: You say you care about the environment, how can you say that if you want to do something like this? The logging and burning will add to the smoke and pollution(not to mention removing vital sources of oxygen and clean air)and the herbicides will KILL animals like HONEYBEES, which are irreplaceable and already greatly endangered by farming. We are taxpayers and a portion of our taxes goes to fund this NATURE PRESERVE, which you are talking about LOGGING and BURNING. This breaks my heart as this place is a piece of historical and ethical significance. I hope you will not take this path, but rather join with the people in preserving our Earth. We only have one.
