Title:

Comments: Thank you for your time in considering this important issue.

Wildlife and water conservation is vital to the culture of a nation.

Without environmental protection to ensure the viability of wild ecocultures for future generations we will lose the treasures of our country.

Woods and water are not ours to use but to care for, for the future generation.

Like Democracy, we are the caretakers only, to pass the light for the dark future.

I oppose any changes for sell or privatization, or commercial use of public lands.

Garrick Ogburn
