Title:

Comments: I am a very avid outdoorsman I hunt and fish a lot in the north Ga mountains But the last 10 years the north Ga mtns has declined majorly as far as the animals and the fishing the streams In my apinion it has a lot to do with the game and fish division for not taking care of what they have instead they are setting around waiting on a phone to ring for someone doing something stupid Now one of my and a lot of other people BIG question is where does our money from the WMA stamp go Someone must be putting it in there pocket because they sure are using it on the WMA the roads are no longer kept up the food plots have nothing but wild grass in most of them

Now for the rest of the story I take some all day walking and stalking deer and turkey hunts that is what I love to do but now I'm just going for exercise I have walked miles and my see where one deer has been And more than likely there was a coyote after it. The same thing with Turkeys. Some of my spots 10 years ago I could hear 6 to 8 different gobblers a morning not any more luck if you hear 1 The Grouse and Quail that use to be around here they are a thing of the past And the DUMBEST thing ever was opening trout season year round I use to love to catch native trout Not any more Some DUMB ASS really didn't think this one through !!!!! If something's is not done our kids and grand kids have no future in the outdoors !!

Thanks and hope someone gets something out of this
