Comments: We enjoy our recreation in the N. GA mountains and corresponding foothills. Please use your vast education, knowledge and experience to conduct the business of forestry management as deemed necessary. Please do this under the guidelines of scientific data rather than emotions. We as a body tend to venture away from the necessary functions needed to promote and defend our forest and waters. This often happens when a few well intended but subject illiterate individuals or groups cry foul and wrap their arms (figuratively and literally) around the forests which need our/your protection and guidance.

Please provide the necessary acts to preserve and protect our HEALTHY forest lands for our use and of our children and grandchildren.
