Comments: Hello! just wanted to take a minute to comment and say how much I have loved being able to escape from the city and enjoy the beautiful resources of North Georgia over the last nine years I've lived in the state! It's an absolute natural treasure and I understand that national forests need to be used in more than just recreation however I feel like it is vital that the public is involved and has a say and how and when and where and why these activities occur! being left out of the process deprives Georgia residents of an opportunity to enjoy their natural resources that we spend our tax dollars to protect and maintain.
