Comments: Jake Bull Mt is an amazing mountain bike trail that is used by many outdoor enthusiasts from horse riders to Mt biking. Unfortunately in Georgia there's simply not enough mountain biking space compared to North Carolina and other surrounding southeast states. Even South Carolina is investing considerable sums to provide areas that will be shared by all outdoor enthusiasts for years to come. I know myself and others included would be devastated to lose this wonderfully preserved and maintained trails mountain bikers.

I would love to keep supporting the local community by my continued visits to these trails rather going out of state.
