Comments: I just found out about the Forest Service's forty-year plan to introduce more timbering, burning, and spraying of herbicides to the Chattahoochee Forest. I have not read the 206 page proposal but I did read that your plan includes "ecological restoration". I have seen the results of timbering and the so-called forest restoration and I believe that the hundreds of miles for bulldozer paths and timbering roads along with the loss or relocation of trails and public areas is a more along the lines of "ecological destruction".

Please consider opening this up for more discussion and extending the period for public comments.

Thank you for your time and consideration.
