Comments: First of all the trail system at Bull/Jake mountain are multi-use and are well loved and maintained by the Equestrian's and Mountain Bike communities. So I am completely against the proposal and potential logging of this area.

To completely cut off any public input and potentially log 60,000 acres in this area is absolutely wrong and atrocious.

I and everyone else who has signed this petition are completely against this proposal.

This is wrong on so many levels and the area needs to be left as it is for all to enjoy, not for the benefit of logging companies to rape and pillage the area.
