Comments: Why would anyone in their right mind even the bureaucratic idiots that only want to spout off at the mouth to hear their own horn blown than to actually do anything helpful for this country or world, want to sway popular opinion into NOT doing everything we can to improve the habitats of our national forests. National forest when first established were done so to sustain healthy, diverse, and productive forests and grasslands for present and future generations. We need to get back to establishing better habitats and ecosystems for our wildlife on National forests, Roll on project..
