Comments: I am concerned with the lack of information about exactly where and when you will be cutting trees, reworking trails, and burning areas near many of my favorite trails and camping areas. I am worried that when we plan our hikes and camping trips, we won't know if we'll be in a project area. I want to keep the long standing practice of being notified and given an opportunity to have a say in where management and disturbances occur.

If the Forest Service does not plan to include the public in site-specific decisions before implementing, I would like the Forest Service to specifically identify and explicitly prohibit cutting, herbicide application, and road work close to trails in the Foothills Landscape. The experiences on the trails within Foothills and in the National Forest should reflect a sense of natural beauty.
