Comments: Public lands are intended to be held in the trust for all Americans, they not only provide a connection to the natural world but a connection to what defines America. The Foothills Landscaping project threatens to strip away the natural beauty of this area, but completely alter it for future generations therefore, going completely against the purpose of the conservation at the core. Further, the lack of specifics in the plan limits public input. As tax payers and land owners, we have a right to participate in the decisions regarding any public lands. I do not support the proposed Foothills Landscaping Project.
