Comments: I am appalled at yet one more proposal by the National Forest Service to limit public involvement in actions of public lands, and I am especially concerned about the details of the Foothills Landscape Project in the Chattahoochee National Forest. Please put me on record with serious misgivings about these proposed actions and with even more serious misgivings about the increasing willingness of government to take actions in our forests without proper environmental considerations, with disregard to NEPA, and with decreased involvement from the people whom these actions affect.
