Comments: I am concerned about the proposed logging that is part of the Foothills Landscape Project and wish that the plan could be reconsidered to close loopholes and limit timbering. I am concerned about this project both locally and globally. Protecting the canopy is a key to forest health and to limiting climate change. Planting trees cannot possibly make up for the loss of trees and our planet is at a dangerous tipping point. While parts of the plan sound good, I am concerned about the history of overharvesting timber, and the disastrous potential of the loopholes in this project plan. I urge the forest service to go back to the drawing board on this plan for the good of this beautiful national treasure of a forest and for the health of the planet.
