Comments: Hello,

I appreciate the opportunity to comment on the Foothills Project. I don't think it will help if I reiterate the science and specifics of the dangers of what is being proposed with the logging, roads, and chemicals. I think you know the harm and are smart enough to realize the likelihood of effects we cannot predict just yet. I don't think it's lack of awareness or knowledge. I think it's being overlooked for some reason. So, I urge you to see the forest for the trees this time. To allow us, and you, to continue to see it still standing and thriving and intact. To protect it so that it may protect and benefit other life, including ours. I urge you to see the greater impact of this shorter term benefit. Not only to see it, but to care about it.

Thank you for you time and consideration.
