Comments: Dear Sir or Madam,

I am emailing you in regards to the Foothills Landscape Project # 52509. I would like the Forest Service to be required to let the public know exactly where the logging, trail relocations, and application of herbicide will take place. This is quite a large area and the public needs to be informed of all changes before they begin. I have been a visitor and user of this wonderful forest of North Georgia for fifty or more years and resent the heavy handed changes handed down without more public input.

Sincerely,

Raymond Lee
