Comments: I oppose any of these changes to our beloved National Forest. Desoto Falls? No, this is not only not needed, but it's also being done with no public input into the decision. With all the issues with climate change, we shouldn't have to be protecting our own backyards! We don't even know if this stuff is actually needed? No, the public owns the national parks. We are the ones to make these decisions, not the Forest Service alone!
