Title:

Comments: I strongly oppose the Forest Service plan as proposed. Having worked on the original Wild & Scenic River designation as well as the original Wilderness Area designations for Georgia in the 1970s as a staff member for Senator Herman Talmadge, Chairman of the Senate Agriculture Committee, I came to understand the unique value of our forests in north Georgia. The forests are a valuable resource for all Georgians and Americans and it is our obligation to future generations to preserve it.

Thank you.

John Hayes
