First name: George
Last name: Christian
Organization:
Title:
Comments: Please allow selective cutting and replanting in suitable crops that benefit wildlife. Leave some cut areas fallow to allow for bedding areas for wildlife. Protect streams by cutting trees away from adjacent to streams.

Any roads established for removing trees should be fixed to prevent erosion and planted in a suitable plant/seed.

Allow prescribed burning on a rotational basis.

Enlist wildlife groups to provide volunteer labor and resources to plant native fruit trees, etc.

Educate the public on the benefits of managing a forest vs non-management from the stand point of wildlife.
