Comments: I am opposed to the:

Foothills Landscape Project #52509

The USFS should take into account the effects of their actions on climate change. Also, I'm opposed to the proposed changes in public comment and input in how our National Forests are managed.

Destroying the forest to put them back better is stupid. Leave them alone and they will rebalance naturally.

Our national forests priority should be instruments to combat climate change and to provide recreation for the people. The Forest Service science is suspect as it is focused on finding preordained outcomes that support timber harvests.
