Title:
Comments: This message is wrote with respect for the Forest Service, I realize that the way of managing our forests at the present time, is much different now than it was 20, 30 years ago.....being a rabun county , with over 200 years of family history here, what is happening to this county in the way of growth has had a huge impact on our woods, rivers and creeks...I'm getting closer to the 50 year mark, in my life time there has been tremdous changes, being a hunter, fishermen and out door man. The decisions you as a group have to make are not easy, no matter what you do, you will be judged positively or negatively.....I for one appreciate the work you do, have many friends who work the USFS. My only remarks to this are, please listen to the local , native people. The ones who have worked this land , fished, hunted, walked these beautiful mountains, and at the end died and buried in these mountains as my ancestors before me have....they had as I have a deep love for these mountains and care deeply as to how their managed.... Thank you for taking the time to read this .... Regards Shane Ramey 706-206-1040
