Comments: I am strongly against the Foothills Landscape Project, which would allow the Forest Service to log, burn, build "temporary" roads, and close or reroute trails at undisclosed locations within a massive 157,000-acre project area with no guarantee of participation from members of the public who visit and love those lands.

public lands are owned and shared by all of us. The public should be made aware of all activities involving the management of their lands and should be given a meaningful opportunity to share concerns about specific actions. That requires knowing where actions will occur on the ground.
