Comments: I am for Timber cutting and wildlife mgt on all USFS lands in Georgia and all of the other states also. The USFS has become a bloated do nothing agency in last 30 yrs instead of putting trails all over the National forest and not maintaining them how about hiring attorney and suing these SO called Friends of the forest every time they block a Timber sell on USFS lands . Maybe then in few years we will see a more healthy forest and a better population of all species of wildlife non_game as well as game species(Aldo Leupo;ld once said a Axe is the best Wildlife Management tool made which now would be a power saw and maybe some controlled burns in Modern times thank u Bill Bunch
