Title:
Comments: I just found out about these proposed changes shortly before the deadline for comments on 1/10/20120. I do understand the importance of managed forestry. However, I also love having the mixed use trails available in this beautiful part of the Georgia mountains. There are groups that have invested countless hours and significant financial amounts to building and maintaining these trails.

While finalizing your plans, please consider the importance of having these trails available for hikers, bikers and horse riders in the community.
