Comments: I support the SELC sentiments and several others who expressed the inclusion of public comment throughout the project and beyond.

It is fundamentally wrong to exclude or limit public evaluation and/or comment. As Charles Seabrook said, "you need us as much as we need you".

I do not support chemical treatment on such a vast area due to the vulnerability of this area's waterways and spring heads.

I do not support the logging practice of trees for product.

I submitted additional comments in a letter.

Thank you for the energies to collaborate on such a vast project.
