Title: Owner/Founder
Comments: I am writing today to express my concern and anger over the Foothills Landscape Project being put forward by the US Forest Service in northeast Georgia. My business and personal and professional life depend on the health and viatality of our beautiful and majestic public lands. I and most everyone I know in the region highly object to this project. It is shortsighted, wanton and reckless.

Undoubtedly, you have received many comments, letters, and protests in the short month since your agency tried to slide this under the cover of the holidays, so I will make this message short. What you are doing is deplorable and despicable. I and many others will do all that we can within the law to ensure that this project is halted.

Thank you for your time. Good day.

Linc Stallings
