Comments: I object to the Jordan Cove LNG Pipeline that will cut a swath of forest over 200 miles, subject to methane leaks and gas spills, between Klamath Falls and the Oregon Coast financed by a Canadian company. This LNG pipeline purpose is to load the LNG into tankers shipping the fossil fuel to Asia of wich none of this LNG will be consumed in Oregon. We Oregonians do not want the state to be a conduit for dirty fossil fuels to be shipped and consumed in Asia adding greatly to global warming.
