Comments: I recently became aware of the fact that the Forest Service plans to strip many Idaho rivers of their Wild and Scenic designations. This is a terrible idea. The Trump administration doesn't care about our nation's natural treasures nor do they care about the people who recreate within them nor the animals who call these places home. As a citizenry and as elected officials we should all be protecting more land and water as opposed to less.

Please leave the Idaho rivers in questions alone and do not alter or degrade their current protections. If anything, increase the protections for these rivers and many others.

I cannot wait until Donald Trump and all his greedy colleagues and partners are out of office and hopefully out of the realm of those who are able to make decisions that affect this nation and this planet.
