Subject: 36 CFR 219.54(c) Objection Pacific Connector Pipeline Forest Plan Amendments for the Umpqua, Rogue River Siskiyou, and Fremont-Winema National Forests

Dear Forest Service:

In accordance with 36 C.F.R. Part 219 I, David Tourzan, hereby object to the project described below.

DOCUMENT TITLE: Opportunity to Object, Forest Plan Amendments for Pacific Connector Gas Pipeline on The Umpqua, Rogue River Siskiyou, and Fremont-Winema National Forests.

PROJECT DESCRIPTION: The proposed action will make provision for 30.6 miles of the Pacific Connector Pipeline route to cross National Forest System (NFS) lands administered by the above-mentioned Forests. These areas affected by this decision include approximately 591 acres of lands associated with the proposed construction of the Pacific Connector Pipeline Project and approximately 186 acres associated with the proposed permanent right of way for the Pipeline Project, which would cross approximately 10.8 miles on the Umpqua National Forest in Douglas County, 13.7 miles on the Rogue River Siskiyou National Forest in Jackson County, and 6 miles on the Fremont-Winema National Forest in Klamath County.

PROJECT LOCATION (Forest/District): Umpqua, Rogue River Siskiyou, and Fremont- Winema National Forests, Douglas, Jackson, and Klamath Counties, Oregon.

NAME AND TITLE OF RESPONSIBLE OFFICIAL: Alice B. Carlton, Forest Supervisor and Responsible Official, Umpqua National Forest.

LEAD OBJECTOR: David Tourzan, contact information available above.

TIMELINESS: This objection is timely filed. Notice of the Opportunity to Object to Plan Amendments for Pacific Connector Gas Pipeline proposed decision was published in the federal register on November 22, 2019. Sixty days from November 22 is January 20, 2020.

REQUEST FOR MEETING TO DISCUSS RESOLUTION: I, David Tourzan, hereby request a meeting to discuss potential resolution of the issues raised in this objection.

STATEMENT OF ISSUES:

The current Land Use Management Plan for the Forest Service requires that developments (such as pipelines) in older forests or land use allocation-Late Successional Reserves must be neutral or beneficial "for the creation and maintenance of late-successional habitat." The proposed action to amend the existing forest plan to create a permanent clearcut which increases fire hazards, through old growth forests, to facilitate a fracked gas export LNG project does not meet the neutral or beneficial standard. Designating Matrix land use allocations to Late Successional Reserves will not mitigate the environmental consequences from the proposed Fracked Gas Jordan Cove Pacific Connector Pipeline.

This is basic common sense, as an Oregonian, ask any child, "is it a good idea to put a flammable toxic gas pipeline under the Wild and Scenic Rogue River, water source for tens of thousands of humans, and habitat for endangered salmon? You know in your heart the right answer, so only one question.

How much would you sell your sister for? How much would you sell your mother for? How much is your soul worth? Can you face your grandchildren knowing you wiped out the last ancient spawning grounds?

SUGGESTED REMEDIES THAT WOULD RESOLVE THE OBJECTION:

Klamath Siskiyou Wildlands Center et al. respectfully requests that the Forest Service withdraw the recommended project and -

1. Prepare a project that meets the standards and guidelines of the existing land use management plan; or
2. Deny the project.

DESCRIBE HOW THE OBJECTIONS RELATE TO PRIOR COMMENTS:

Signed,

David Tourzan
