Comments: I have been very involved in this Forest Plan Revision for years. I have never missed an opportunity to comment and feel this comment is going to be my final chance to make it aware that I have never changed my mind. I have done and signed petitions, mailing them even to Dept of Agriculture in Washington and all agencies and FS offices, hoping and praying that someone is listening to the importance of my selection of plan X. It is unfair and unjust to implement any of the other plans. We love and enjoy our forests and have been putting up with restrictions on trails, roads. We have and will continue to comply with the Wilderness areas. BUT let us travel the roads that are now restricted by for a number of reasons. Let the handicap, the elderly and all spend time recreating our Forest. Remove and don't add restrictions. My biggest concern is the Red River District in the NezPerce/Clearwater Forest. Stop PLEASE unlock the gates and remove the road restrictions. I could live with a period of May to September of having gates and restrictions removed. Giving the Elk, Moose and Deer their privacy for calving season. All gates and roads open in the winter months. I hope my input helps you and all realize that Plan X is the best plan for we Americans that love our forest.
