Comments: Do not remove any Wild and Scenic protections from any of the rivers or tributaries. As a former outfitter in the Clearwater NF, I understand that tourism is the biggest attraction to the area and what supports the local economies. People come to this area BECAUSE it is protected and clean and free from the development that is blocked by Wild and Scenic status. Don't mess with it. Congress designated Wild and Scenic status for a reason. Why do policy makers perceive that something has changed and these protections are no longer relevant?
