Comments: Cancel the Valle Seco Land Exchange

Dear Becca Smith,

Why is this even on the table? We live in one of the most sought out parts of the United States for fishing and outdoor recreation. These people only care about money, not our home. They will do whatever they can to put more in the bank regardless of what happens to the forests, rivers and lands we call home. There are already too many privatized parts of the rivers in our area that we don't have access to and you want to give it away to these money mongrels? What good has the Dakota access pipeline done? Do you want this to be another similar situation? Do you think our president cares about national forests and preserving nature? No. It is up to you, up to us, to protect the sacred place where we live. Please do the right thing.

Sincerely,

Kathleen Wheeler
