Subject: Sam Houston National Forest

Mr Potts;

We are opposed to the fracking proposal for the Sam Houston National Forest. We are residents of Montgomery County and live on Lake Conroe and are very concerned over the environmental impact on the water quality coming from our water shed along with the impact of heavy oil field equipment being transported on our roads. We believe that National Forests were created for recreational use such as, hiking, camping, hunting and fishing not oil and gas exploration.

Thank you, Herb and Barbara Hilton
