Subject: Stop plans for fracking Lake Conroe/Sam Houston Natl Forest

The plans of the National Forest and Grasslands in Texas to lease land for Oil and Gas exploration must be stopped.

Please accept my voice as only the spokesperson for everybody who lives in Walden, Bentwater, Seven Coves and all other lake side developments. We do not want oil rigs and trucks tearing up our national forest and polluting the drinking water of Lake Conroe. The city of Houston owns two thirds of Lake Conroe for drinking water. Montgomery County/Conroe own one third.

Fracking will pollute the lake, kill the fish, destroy the tourism, boating, and all other recreational activities.
