Subject: Fracking in Sam Houston State ParkDear Mr. Potts:I tried to go to the "official" website

<http://www.fs.usda.gov/goto/texas/oil-and-gas> to make known my strong objections against fracking in the Sam Houston State Park but the website does not load. How convenient if they don't want to hear any comments against the project.I believe state parks need to remain set aside for people and not for industry. I am not sure who stands to benefit from oil and gas production in this area but it certainly is not the property owners who live around Lake Conroe. I strongly urge you to vote against issuing industrial leases in our state parks, forest preserves, national parks, etc.Thank you.Barbara Crystal
