Subject: Fracking permit for Lake Conroe

.Dear Mr. PottsAccording to my financial adviser the price oil is so low that it is questionable whether or not it can be recovered at a price that allows for a profit. The reason for this problem is less demand for oil and a surplus of available oil both today and the foreseeable future.I am in favor of oil and gas exploration but there has to be some common sense applied to where this exploration needs to occur. Exploration around Lake Conroe and in the Sam Houston National Forest must be prohibited.Our drinking water comes from Lake Conroe and Sam Houston National Forest is important in preserving wildlife and plants and trees.Please do what you can to prevent the proposed lease from being granted.ThanksRobert L Bennett
