Title:

Comments: Hello,

Thank you for all of the work that has gone into preparing this project. I am supportive of the project. As a member of the Kilroy Bay\Pine Cove community my primary concern is fire danger. It looks like this project will greatly reduce fuel load and improve forest health.

I do have one concern. I would prefer to see no increase in long term road access or ATV accessible areas. I find that many members of the public seem to take ATVs anywhere they can easily access on forest service land, whether a road is in place, or not. Not only does this significantly increase fire danger, it is damaging to the land and increases erosion. I would prefer the forest service take this serious concern into account for this project.

I am also concerned about increased traffic to the Kilroy Bay / Pine Cove area. The small forest service road that access Kilroy from Granite Creek road is critical for fire protection, and I would prefer to not have a huge increase in traffic levels. I would prefer to not have a road with greater traffic throughput capabilities between those two communities.

Thank you
