Title:

Comments: I am a pack goat owner. I would like to know what type of methods you will use to conduct a risk analysis of contact between Pack Goats and Wild Sheep. I would like pack goats analyzed separately from "domestic goats." I would like you to include the Best Available Science (published and unpublished) specific to pack goats. You absolutely must distinguish between "risk of contact" and "risk of disease transmission"; these two terms are NOT interchangeable.

I am volunteering to be a "subject matter expert" on pack goats and their behavior, when you are developing and writing your risk analysis.

I would like you to include the Mitigation Measures (Best Management Practices) developed by the North American Pack Goat Association, across all alternatives, and require these Measures by both commercial outfitters and recreational pack goat users.
