Comments: PLEASE READ THIS.

I have already submitted my rejection of this project a few months ago by Email and a written letter, if I recall correctly.

I am now begging you again to reconsider your plan to pollute our coastline.

Don't try to fool yourself into thinking herbicides simply evaporate. Its a fact they kill and damage wildlife and trickle through the sand and into the ocean where they are just as deadly. We know this whole program is to promote more open areas for dune buggy riding and we are furious that you are trying to dupe the public. The beach grass stabilizes the dunes. Its fine where it is.

If you want state revenue start ticketing the speeders!!! You'll make millions.

NO HERBICIDES ON OUR BEACHES !!!!!!

NO BURNING---IT ADDS TO AIR POLLUTION, GLOBAL WARMING AND CLIMATE CHANGE !!!!!

STAY OUT OF THE AREAS NORTH OF FLORENCE !!!! We don't want dune buggies there!!

How dare you use plovers and martins as an excuse to open more beaches to dune buggies that have gasoline engines and contribute to carbon emissions and noise pollution !!!!!!!

We are sick of listening to dune buggies all over town! It's madness. There were no ATV's on the beaches when I first started visiting them 46 years ago. Why are they a necessity now?

And whatever happened to the govenor's promise to reduce carbon emissions?

KEEP DUNE BUGGY RIDING to the SOUTH OF FLORENCE OR BETTER YET, OUTLAW IT !!!

PLEASE get your conscience out of your wallet and act globally !!!!!
