Subject: Objection to Sam Houston Nat'l Forest Lease

I tried to file my objection via the website but the link

"https://www.fs.usda.gov/wps/PA_WIDConsumption/goto?shortURL=texas/oil-and-gas " didn't work.

I live and work in the Lake Conroe surrounding area and do not agree to allowing anyone to do Oil or Gas exploration for fracking or any other purpose in the Sam Houston National Forest. I am frankly surprised that I even need to be typing this. I had incorrectly assumed that such a thing could never be allowed.

There is no scenario in which that would be beneficial for the Forest ecosystem and the potential for damage to our Lake, and it's ecosystem is too great.

There is no scenario in which that would be beneficial for our water supply.

There is no scenario in which that would be beneficial for our businesses around the lake.

There is no scenario in which that would be beneficial for our homes and communities around the lake.

No.

Thank you,

Carolyn Jones
