Comments: As a home owner at Bead Lake, I am both heartened and concerned by the plans to expand the Bead Lake parking area, enhance the boat launch, and complete the trail around the lake. On the plus side, the continuation of the trail will increase hiking options for Bead Lake residents and visitors. On the other, the changes to the boat launch and parking area will create increased traffic on a pristine lake and may add to noise and milfoil problems.

Any problems can be mitigated by:

- 1) ensuring there is a camp host. This will require providing wifi access at the camp host facility and perhaps increasing the pay that the host will receive. (This past year, there was no host which resulted in numerous problems).
- 2) Providing a boat washing station to reduce the chance of milfoil coming into the lake from visitors' boats.
- 3) Providing clear ample signage on milfoil education and on lake consideration rules. (Only ? of the lake has residences. Common courtesy is to stay away from the houses and use the rest of the lake.)

This is a wonderful lake and I am happy to share it with visitors. But I would like to reduce the problems that could arise with increased usage.

Faith Hayflich
