Comments: I support the Redstone to McClure Pass trail because it would be another incredible trail system in our special valley. This would no doubt bring in more folks to the valley to ride the trail, appreciate our landscape, support businesses, and develop a deeper personal connection to this area and strive to protect and share it. I believe we have a a great community here that would be very willing to aid in the building and development of the trail as well which could help to decrease cost and time in building.
