First name: peggy

Last name: conroy

Organization:

Title:

Comments: Please stop trashing our wild horses by horrible terrorizing roundups, penning, killing and maiming them. There are just few thousand left while at the same time there are MILLIONS of livestock, energy installations, illegal private developments, etc on our 245 million acres of public lands.

The horses and other wild animals don't ruin it, BLM programs and other government programs run by corporate money really ruin it. If the wild animals are left to themselves they don't overpopulate. Humans and their money wishes are what ruins the world, upsetting any sort of balance that could be achieved otherwise. There is a LAW that protects wild horses----it has been ignored and "fixed" for the wealthy by sneaky GOP politicians.
