Comments: I have a real problem with the wild horse situation in Heber! I'm not so sure that the Forest Service themselves, have been ordered to kill the horses, and that is why no one has been arrested for doing the shootings.

Leave those horses where they are, and protect them, as they are supposed to be protected, under Federal Law!

Those beautiful horses are a part of Arizona History, and Heritage, and should remain just as they are!!!

People, come from all around the Country, to see these beautiful Animals.

Protect them as you are paid to do, and if the forestry service members have been ordered, by their superiors to shoot and kill them, all of the person's participating in, and ordering this to be done, should be prosecuted and jailed!

And, lose their jobs as well. Let those horses continue to live, and be free as they have been for many, many years.
