Comments: I am absolutely opposed to the Heber Wild Horse Territory Plan #18916. This proposal has been floated for a number of years until a federal judge put a stop to it. I recently communicated with the Forest Supervisor for the Apache-Sitgreaves National Forest regarding the killing of federally protected horses on federal lands in and around Heber, and received no response. To allow the very office who wants to rid the area of wild (federally protected) horses to make a final judgement on this plan is likened to the "fox guarding the hen house".
