Comments: I FULLY SUPPORT the proposal to prohibit camping and campfires in our forest lands. I live close to a designated "scenic byway" where open camping is allowed and it saddens me to see motor homes, trailers as well as tents with tarps and clotheslines, etc., spread throughout a large area and where the whole area appears to be like homeless tent camps. If it were a controlled state or federal campground that would be different.

However, being uncontrolled there currently there is no sanitation (where are these people who camp for weeks going to the bathroom???), trash containers nor containers that support campfires which is a big fire concern. I do not feel safe walking in these areas due to trash/ needles/human sanitation concerns. Thank you for the opportunity to comment.
