Comments: To whom it may concern,

I write to register my full support for the construction of a cycling/hiking trail from Carbondale to Crested Butte but in particular for the section between Redstone and McClure pass #56913 under consideration at this time.

I support most efforts that get people into the woods. The more opportunities we can create to ensure most of us have a strong relationship with wild places the better taken care of our wild places will be. As I understand it, the trail will be constructed on significant quantity of existing/historic pathways. Disruption to wildlife and homeowners will be minimal in this area and do not constitute, in my opinion, a justification to deny the greater public an opportunity to access land via mountain bike or foot.
