Comments: I don't understand what is to be done with the horses remaining after the

104 have been selected. I would also like to know exactly what the problem

is with having a Wild Horse Herd. Other states have wild

horses and don't seem to have Arizona's problems. We are

encroaching on their natural habitat by building on it, giving

the herd less and less area to live. They are in these areas because that is where they have always been. Yet

we continue to build, giving them less and less area to survive. Please do not allow these horses to be sold to

Canada or Mexico for dog food. Humans are overpopulating areas also, but continue to build. Let's learn to live

with a huge part of American history, the answer is not killing them. Please explain exactly what it is that is going

to happen to these beautiful animals.
