Comments: The Forest looks like 1,000 horses are out there based on there is virtually no forage left for wildlife or cattle in the summer months. The horses were not here before the fire and I don't think they belong on the ASNF. Remove them and let the land heal.

I have 2 friends who were riding mares out in the forest on BMRD and a stallion came and tried to steal their mares away from under them. Another lives bordered by the ASNF and her mare in a barbed wire pasture got torn up real good because a stallion was trying to steal her out. The owner had to get Vet care to suture the deep wounds then had to get rid of her horse not being able to keep that stallion away.
