Comments: This section of trail already sees quite a bit of use. In the winter, it is frequented by hikers (snowshoers) and dog walkers. Seasonally, it is already ridden by mountain bikers and used as a target practice location. I ride the trail as it is and enjoy the gorgeous views of the valley. Being that the trail is already in use, the project makes sense and additional maintenance would do it well.

It is currently used year-round, however seasonal closures for wildlife might be necessary. It's a gift to be able to share our precious valley with others!
